

That's what you want-what you expect-every time from your car. But you cannot get it unless the battery of your starting system is in proper condition.

At this time of year, when you are getting your car in shape for summer, your battery should be carefully inspected. We inspect all makes of batteries free of charge. That's our method of getting acquainted.

# The "Exide" Starting Battery

is the one best bet in starting batteries. There are over 400,000 "Exice" Batteries now in service. We are the "Exide" Distributor in this territory.

Drive around and let us look over your battery.

# DEMOCRATS ARE

Plan to Rename Wilson and Marshall Is Unalterable: Absolute Harmony Prevails Among Leaders,

Louis, June 10 -Out of the echees of the Chicago conventions there came tonight the sound of the advancing hosts of democracy that are to meet here next week to name the standard bearers of their party for the presidential campaign. The advance guard of delegates came in scattered groups from Michigan and Illinois and their number will be augmented by heavier reinforcements from all over the country tomorrow.
All interest and discussion among

the national committeemen and dele-gates centered tonight on the nominations made at Chicago and what effect and bearing they would have in

campaign.
Democratic Plans Unchanged. National Chairman McCombs agreed that no matter what slate had been elected in Chicago by either of the parties, it would not in the slightest affect the plan of the democrats rename President Wilson- and Vice

President Marshall.

The renaming of Wilson and Marshall after the 1,092 delegates have adolted a platform which in the main has hern sketched by President Wilson, is expected to be carried through without a hitch Friday night or early Saturday recently.

Saturday morning.

The names of one or possibly two or three other candidates beside that of Mr. Marshall may be presented in convention for vice president, but are expected to be withdrawn before the first roll call is concluded. Governor Elliott Major of Missouri is a candidate for the ticket and reports have it that the names of Governor John H. Morehead of Nebraska and Senator Rotert Owen of Oklahoma will be put

now in a position to offer two cars for hire by the day or hour to people who desire to do their own divising.

Not a Storm Cloud.

ore and it is becoming richer as one goes deeper. In the depth the copport the west, begins a slowly rising into pure fornite. The predominat

the tunnel was started at a wrong place, as it runs almost parallel to the vein. At a distance of about 600 feet a slight disturbance is found and at the end of the tunnel a vein been struck which has been miso by this disturbance. Further

veloping work is soing on.
3-At a second vein, not far from the above mentioned, small investi-gating work has been done, but which shows good prospects. An analysis of the crushings show the following Gold, per ounce per lon ... \$

Silver per ounce per ton. Gold and silver value. . . .

4 per cent tungstic acid. The ness of the mountains and the distance of the paralleled veins per mit expansive and cheap mining ex ploration. One ought to cross-cut the various veins at a certain depth an then start stoping systematically from below upwards. By this kind of work oue avoids holsting through the shaft, saving thereby time und expense.

The above mentioned tunnel can be a made neefal by starting tunnel work at the end of this tunnel to both sides which to be the starting tunnel with the conduction of the starting tunnel work at the end of this tunnel to both sides which the starting tunnel work as the conduction of the starting tunnel work at the conduction of the starting tunnel work as the conduction of the starting tunnel work as the starti which is bound to cut various voins.

Concentrating—About one and a half miles from the mine is a first-class concentrating plant, ready for work. This mill has been tailt by Mr. Kins, of benyer Tas capacity of this olant is about thirty to forty tone. Mr. King, of Denver The capacity of this plant is about thirty, to forty tone per twenty-four boars, but can be easily doubled by putting in other. machinery for grinding the ore. The plant consists of us tollows one crusher, two rolls for charse material, two rolls for the material, one elevator, one king patent screen, two Wilfley tables, two separators, and the necessary driving machinery. The the necessary driving machinery. The plant has sufficient water during the entire year, and a good road connects this plant with the mine. The nearest railroad station is about nine miles distant and a good road leads to it.

Generalities—It is to be regretted that one has not been able to successfully work this mine, as it has all the indications of being a good mine. The mine shows already in the outerop such richness of ore that the work would have paid itself from the beginning. It is a pity that the whole mine has not been worked with the necessary technical knowledge. It the necessary technical knowledge. It is to be wished that the work will be immediately begun on this rich and promising mine which can be done without much capital and risk, esp cially now when the prices of mol denum, tungsten, copper, etc., is high and the demand great. ERICH SCHLEIFF, M. E. Forethought.
